

Hydro-Port[®] Adjustable Multi-Outlet Manifold

APPLICATION

- The Hydro-Port[®] is a watering manifold that delivers water to up to eight different plants with independent, adjustable flows per outlet. It is a very efficient method of watering a cluster of plants.

FEATURES

- Multi-outlet emission distribution manifold with either 4 or 8 individual ports
- Adjustable flow from 0-20 GPH for each port
- Maximum flexibility and control to meet plant watering needs

OPERATING RANGE

- Recommended system pressure: 15-50 PSI
- Filtration requirement: 150 mesh

SPECIFICATIONS

- ½" FPT inlet
- Barbs accept either .160" ID x .220" OD or .170" ID x .250" OD tubing

WARRANTY

- NDS Hydro-Port[®] manifolds have a limited one-year warranty.
